## **Frequently Answered Questions (FAQ's)**

### **What is a Glory Photo?**

This is a photo of you holding your fish or a 30 secs video, of you and your team with the fish.

### **How can I see if my fish score is submitted?**

When you open the in the catch screen app, in the top left of the screen is a LOG button.

The list of all the fish will show that you have logged. Under each log will show if the data & image has been received. **For example:**

If it reads **green RECEIVED**, it means the data AND the image has been received to the score checker

If it reads **red NOT SENT** it means neither the data or image has been sent and therefore not received.

If it reads **orange IMAGE NOT SENT** it means the data has been received (fisher, length, type etc) but the image has not been received.

If you have either the red or orange, you will need press the SUBMIT ALL button so its re-uploads. Please keep checking until all your logs show green. Also check your phone reception to make sure it's good before trying to submit again.

### Where can I find the scoreboard?

If you are wanting to check the scoreboard, click the information screen then scoreboard & the event you would like to see.

### Where can I find the scorecard?

In the information screen, click scorecard, here you will see the status of your entries

If you see **ACCEPTED IMAGE RECEIVED** next to the entry, it is the confirmation that the fish and therefore your score for that fish in the server have been accepted i.e. no discrepancies in your scoring.

If you see **SUBMITTED IMAGE RECEIVED**, it means the data and image have been received but the official scorechecker is yet to verify and accept your entry. This simply means the data is still to be checked.

If you see **SUBMITTED IMAGE NOT RECEIVED**, it means the data has been received but not the image. Go to the LOG page in the previous question and follow the resubmission steps.

*If a submission is missing, it's either been rejected (the score does not count due to breach of rules) or nothing at all has been received. If your submission is missing, go back to your log (see previous question) and check your data has been upload. If it is showing as green RECEIVED and the submission is not in the CHECK MY SCORE, your fish has been rejected.*

**NOTE** - in any issue of the above, please do not resubmit data or a fish. If you have queries, please come make contact with a Track My Fish team member.

**NOTE** – if you submit an incorrect size or species or assign to the incorrect angler please do not resubmit your data or fish. If this occurs, please make contact with a Track My Fish team member.
